

BIDET COMPATIBILITY GUIDE

Bidet seats fit on most modern toilets; however, they may not be compatible with some older or specialty models.

TOILET MEASUREMENTS

Elongated & Round Sizes

Toilet Compatibility Measurements

1. Measure the length of your toilet bowl from the mounting bolts to the front of the bowl.
 - **Round toilet bowls** - 16.5 inches
 - **Elongated toilet bowls** - 18.5 inches
2. Measure the distance between the toilet bolt holes. If it's less than 5.5 inches or greater than 7.5 inches, the bidet will not be incompatible.
3. Check that the distance between the bolt holes and the toilet tank is at least 1.5 inches.

ONE-PIECE & TWO-PIECE TOILETS

One-Piece Toilet

Two-Piece Toilet

One-Piece with French Curve

1. Bemis bidets products are designed to fit most standard toilets
 - **1-piece toilets** - seamless unit with no gaps between the tank and bowl.
 - **2-piece toilets** - has a separate tank and bowl that are attached together with bolts during installation.
2. If you have a 1-piece toilet with a deep French curve, our bidets are likely not compatible.

CONCEALED TRAP TOILETS

One-Piece Concealed Trap Toilet

Two-Piece Concealed Trap Toilet

The Bemis bidet seats are equipped with Stay-Tite® and therefore will require an alternative top mounting kit which can be specified at the time of purchase, or as part of our post-sales support team. Please contact seats.orders@bemismfg.com to receive alternative installation kit.
